

Sydney Eye Hospital Professorial (Uveitis) Fellowship

We run a one year Professorial Uveitis Fellowship, starting in July (1 July 2018 to 30 June 2019).

The fellow works primarily with the Professorial Unit:
Professor Peter McCluskey, Professor Mark Gillies, Associate Professor John Grigg, Associate Professor Samantha Fraser-Bell and Associate Professor Clare Fraser.

The Professorial unit provides clinical services in the areas of inflammatory eye disease, medical retina, neuro-ophthalmology and genetically determined eye disease.

The supervisor is Professor Peter McCluskey.

The fellow participates in 30 outpatient clinics and 2 operating sessions per 4 week cycle. This includes both complex uveitic cataract and glaucoma surgery.

The fellowship is a Sydney Eye Hospital based training post providing hands on investigation and management of patients with inflammatory eye disease, medical retina, neuro-ophthalmology and genetically determined eye disease. The Fellow will have extensive exposure to widefield digital angiography, OCT, AngioOCT, laser and intravitreal injections. As well as electrophysiology and reporting.

The research content of the post will include being a sub investigator for Retinal clinical trials. The Uveitis Fellow will participate in Research Clinics with Prof Mark Gillies and A/Prof Samantha Fraser-Bell gaining valuable experience in both in house and international multi-centre clinical trials, for which the Save Sight Institute is renowned. The fellow will also participate in uveitis clinical research projects during the year with the expectation that 1-3 manuscripts will be generated.

The fellow will be involved in the teaching and supervising of registrar and resident doctors, as well as nursing and orthoptist staff members.

We offer this fellowship to doctors at the end of their ophthalmology training or fully qualified Ophthalmologists in their respective country of origin. They are selected based on their experience, references and very importantly their agreed commitment to return to their country of origin to provide a uveitis and medical retina service there.

Sydney Eye Hospital Professorial (Uveitis) Fellowship

FELLOWSHIP TIMETABLE

		Week 1	Week 2	Week 3	Week 4
Monday	AM	AOS-Uveitis	AOS-Uveitis	AOS-Uveitis	AOS-Uveitis
	PM	EPC	Research	EPC	Research
Tuesday	AM	MRC-Gillies	MRC-Gillies	MRC-Gillies	MRC-Gillies
	PM	MRC-Gillies	MRC-Gillies	MRC-Gillies	MRC-Gillies
Wednesday	AM	UVC	UVC	UVC	UVC
	PM	UVC	OT	UVC	OT
